

**Special Topics Course
4205F/9760A
Cognitive Dimensions of Politics
Department of Political Science
The University of Western Ontario
Fall 2013**

Andrés Pérez
SSC4164
aperez@uwo.ca

Office Hours
Thursdays 1pm-3pm

“You, your joys and your sorrows, your memories and your ambitions, your sense of personal identity and free will, are in fact no more than the behavior of a vast assembly of nerve cells and their associated molecules.... No longer need one spend time...[enduring] the tedium of philosophers perpetually disagreeing with each other. Consciousness is now largely a scientific problem.”
Francis Crick

“The brain –that particular body organ– is certainly critical to understanding how we work.... But if we want to understand how the brain contributes to consciousness, we need to look at the brain’s job in relation to the larger nonbrain body and the environment in which we find ourselves. I urge that it is a body –and world– involving conception of ourselves that the new best science as well as philosophy should lead us to endorse.”
Alva Noë

“What our embodied brains are doing below the level of consciousness affects our morality and our politics –as well as just about every aspect of our social and personal lives– in ways we are all too often not aware of. Deft politicians (as well as savvy marketers) take advantage of our ignorance of our own minds to appeal to the subconscious level. Meanwhile, honest and ethical political leaders, journalists, and social activists, usually unaware of the hidden workings of the mind, fail to use what is known about the mind in the service of morality and truth.”

George Lakoff

Important Notice Re: Prerequisites/Antirequisites

Please Note: You are responsible for ensuring that you have successfully completed all course prerequisites, and that you have not taken an antirequisite course. Lack of prerequisites may not be used as a basis for an appeal. If you are found to be ineligible for a course, you may be removed from it at any time and you will receive no adjustment to your fees. This decision cannot be appealed. If you find that you do not have the course prerequisites, it is in your best interest to drop the course well before the end of the add/drop period. Your prompt attention to this matter will not only help protect your academic record, but will ensure that spaces become available for students who require the course in question for graduation.
Office of the Dean, Faculty of Social Science

Rationale and objectives

Over the past three decades, cognitive science –the interdisciplinary study of mind and intelligence– has radically improved our understanding of the way in which we perceive, represent and understand reality. The knowledge generated by this relatively new field of science can no longer be ignored by political science. After all, as Mark Turner points out, social science is a mental activity that deals with human actions conditioned by individual and collective mental processes.

Social science in general, and political science in particular, must critically acknowledge and confront the impact that cognitive science is having on many of the fundamental ontological and epistemological ideas and arguments that have shaped our discipline’s intellectual history. It is difficult, if not impossible, to talk today about the nature of political reality, perception, representation, concept formation, recognition, causality, objectivity, ethnocentrism, and language, without taking into consideration what cognitive science is saying about these topics.

This course has been designed as a first point of contact between students of political science and cognitive science. Its objective is to *introduce* students to key ideas and debates in cognitive science that have a bearing on the ways in which we study and explain political phenomena. In this sense, the course does not require any academic background on any of the disciplines that integrate cognitive science.

Content and Organization

The course will be predominantly based on academic literature and video presentations that explicitly bridge cognitive and social science and that use the language of political and social science to explore the contributions of cognitive science. It will be divided into five interconnected sections:

- I. Introduction: Brain/Mind (two weeks).
- II. The debate about *mental representations* and its implications for Political Science (three weeks).
- III. The debate about the *extended mind* and its implications for the study and understanding of social and political order/social and political institutions (three weeks).
- IV. The debate about *self/other consciousness* and its implications for the study and understanding of morality and justice (three weeks).
- V. Conclusions: Political Science and Cognitive Sciences (one week).

Prerequisites:

Political Science 2237 or 2245

Student Assessment

The overall grade for the course will be determined as follows:

Participation.....	20%
Essay.....	50%
Book Review/s.....	30%

Participation

Students in this course will be expected to master the assigned readings and to actively participate in the discussions that will take place every week. Moreover, students will be required to post a critical assessment of the assigned readings on the *Cognitive Dimensions of Politics Bulletin Board* that will be created for this purpose. Critical assessments must be posted each week by Monday at noon. One or two students will formally introduce the assigned readings each week having read the other students' critical comments on the bulletin board. Additional guidelines for these presentations will be provided by the instructor in class.

Essay

A research essay (15-17) double-spaced page will be due on November 27, 2013 **IN CLASS**. Guidelines for this assignment will be provided by the instructor in class.

Book Review/s:

Undergraduate students will review one of the following books:

Alva Noë, Out of Our Heads: Why You Are Not Your Brain, and Other Lessons from the Biology of Consciousness. New York: Hill and Wang, 2010.

Neil Shubin, Your Inner Fish: A Journey into the 3.5 Billion-Year History of the Human Body. New York: Vintage Books, 2009.

The book review (undergraduates) is due on October 16, 2013, **IN CLASS**.

Graduate students will review two of the following books:

Alva Noë, Out of Our Heads: Why You Are Not Your Brain, and Other Lessons from the Biology of Consciousness. New York: Hill and Wang, 2010.

Neil Shubin, Your Inner Fish: A Journey into the 3.5 Billion-Year History of the Human Body. New York: Vintage Books, 2009.

Andy Clark, Supersizing the Mind: Embodiment, Action and Cognitive Extension. Oxford: Oxford University Press, 2008.

The first book review (graduates) is due on October 16, 2013, **IN CLASS**.

The second book review (graduates) is due on December 4, 2013, **IN CLASS**.

The reviews (undergraduates and graduates) should not exceed 8 double-spaced pages. Guidelines for this assignment will be provided by the instructor in class.

Note: A penalty of 5% per day (including week-ends and holidays) will be imposed on any written assignment that is not handed in on time, **IN CLASS**.

Books Recommended for Purchase:

Bruce E. Wexler, Brain and Culture: Neurobiology, Ideology and Social Change. Cambridge, Massachusetts: The MIT Press, 2006.

Alva Noë, Out of Our Heads: Why You Are Not Your Brain, and Other Lessons from the Biology of Consciousness. New York: Hill and Wang, 2010.

Neil Shubin, Your Inner Fish: A Journey into the 3.5 Billion-Year History of the Human Body. New York: Vintage Books, 2009.

Movies Recommended: Consult the *Cognitive Science Movie Index*:
<https://www.indiana.edu/~cogfilms/>

Support Services

Students who are in emotional/mental distress should refer to Mental Health@Western <http://www.uwo.ca/uwocom/mentalhealth/> for a complete list of options about how to obtain help.

READING MATERIAL

I. INTRODUCTION

September 11: Introduction to the course: Brain/Mind

September 18: Political Science: The absent brain?

George Lakoff, The Political Mind: A Cognitive Scientist's Guide to your Brain and its Politics. New York: Penguin, 2009, 1-110.

Mauricio Meloni, "On the Growing Intellectual Authority of Neuroscience for Political and Moral Theory: Sketch for a Genealogy," in Frank Vander Valk, ed., Essays on Neuroscience and Political Theory: Thinking the Body Politic. London and New York: Routledge, 2012, 25-49.

Leslie Paul Thiele, "Brain Sculpting as Moral Practice: a Neuro-Aristotelian Approach," in Essays on Neuroscience and Political Theory: Thinking the Body Politic. London and New York: Routledge, 2012, 119-139.

II. The debate about mental representations and its implications for Political Science

September 25: The Embodied Brain/Mind

Joseph LeDoux, Synaptic Self: How Our Brains Become Who We Are. London: Penguin, 2002, 1-32.

Mark Rowlands, The New Science of the Mind: From Extended Mind to Embodied Phenomenology. Cambridge, Massachusetts: The MIT Press, 2010, 1-84.

Bruce Hood, The Self Illusion: How the Social Brain Creates Identity. Toronto: Harper Collins, 2012, 1-33.

October 2: Brain/Mind: Evolutionary Arguments

Edward O. Wilson and Daniel C. Dennett, "Evolutionary Philosophy," in Adam Bly, ed., Science is Culture. New York: Harper Perennial, 2010, 1-22.

Daniel Lord Smail, On Deep History and the Brain. Berkeley: University of California Press, 2008, 12-156.

October 9: Mental Representations

George Lakoff, "Philosophy in the Flesh," in John Brockman, The Mind. New York: Harper Perennial, 2011, 11-30.

Daniel Kolak et al., Cognitive Science: An Introduction to Mind and Brain. New York: Routledge, 2006, 5-53.

**APPENDIX TO UNDERGRADUATE COURSE OUTLINES
DEPARTMENT OF POLITICAL SCIENCE**

Prerequisite checking - the student's responsibility

"Unless you have either the requisites for this course or written special permission from your Dean to enroll in it, you may be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites."

Essay course requirements

With the exception of 1000-level courses, most courses in the Department of Political Science are essay courses. Total written assignments (excluding examinations) will be at least 3,000 words in Politics 1020E, at least 5,000 words in a full course numbered 2000 or above, and at least 2,500 words in a half course numbered 2000 or above.

Use of Personal Response Systems ("Clickers")

"Personal Response Systems ("clickers") may be used in some classes. If clickers are to be used in a class, it is the responsibility of the student to ensure that the device is activated and functional. Students must see their instructor if they have any concerns about whether the clicker is malfunctioning.

Students must use only their own clicker. If clicker records are used to compute a portion of the course grade:

- the use of somebody else's clicker in class constitutes a scholastic offence,
- the possession of a clicker belonging to another student will be interpreted as an attempt to commit a scholastic offence."

Security and Confidentiality of Student Work (refer to current *Western Academic Calendar* (<http://www.westerncalendar.uwo.ca/>))

"**Submitting or Returning Student Assignments, Tests and Exams** - All student assignments, tests and exams will be handled in a secure and confidential manner. Particularly in this respect, leaving student work unattended in public areas for pickup is not permitted."

Duplication of work

Undergraduate students who submit similar assignments on closely related topics in two different courses must obtain the consent of both instructors prior to the submission of the assignment. If prior approval is not obtained, each instructor reserves the right not to accept the assignment.

Grade adjustments

In order to ensure that comparable standards are applied in political science courses, the Department may require instructors to adjust final marks to conform to Departmental guidelines.

Academic Offences

"Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, at the following Web site:

<http://www.uwo.ca/univsec/handbook/appeals/scholoff.pdf>."

Submission of Course Requirements

ESSAYS, ASSIGNMENTS, TAKE-HOME EXAMS **MUST** BE SUBMITTED ACCORDING TO PROCEDURES SPECIFIED BY YOUR INSTRUCTOR (I.E., IN CLASS, DURING OFFICE HOURS, TA'S OFFICE HOURS) OR UNDER THE INSTRUCTOR'S OFFICE DOOR.

THE MAIN OFFICE DOES NOT DATE-STAMP OR ACCEPT ANY OF THE ABOVE.

Note: Information excerpted and quoted above are Senate regulations from the Handbook of Scholarship and Academic Policy. <http://www.uwo.ca/univsec/handbook/>

Students registered in Social Science should refer to <http://counselling.ssc.uwo.ca/> <http://counselling.ssc.uwo.ca/procedures/havingproblems.asp> for information on Medical Policy, Term Tests, Final Examinations, Late Assignments, Short Absences, Extended Absences, Documentation and other Academic Concerns. Non-Social Science students should refer to their home faculty's academic counselling office.

Plagiarism

"Plagiarism: Students must write their essays and assignments in their own words. Whenever students take an idea, or a passage from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major academic offence." (see Scholastic Offence Policy in the Western Academic Calendar).

Plagiarism Checking: "All required papers may be subject to submission for textual similarity review to the commercial plagiarism detection software under license to the University for the detection of plagiarism. All papers submitted for such checking will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the service is subject to the licensing agreement, currently between The University of Western Ontario and Turnitin.com (<http://www.turnitin.com>)."

Multiple-choice tests/exams: "Computer-marked multiple-choice tests and/or exams may be subject to submission for similarity review by software that will check for unusual coincidences in answer patterns that may indicate cheating."

Note: Information excerpted and quoted above are Senate regulations from the Handbook of Scholarship and Academic Policy. <http://www.uwo.ca/univsec/handbook/>

PLAGIARISM*

In writing scholarly papers, you must keep firmly in mind the need to avoid plagiarism. Plagiarism is the unacknowledged borrowing of another writer's words or ideas. Different forms of writing require different types of acknowledgement. The following rules pertain to the acknowledgements necessary in academic papers.

A. In using another writer's words, you must both place the words in quotation marks and acknowledge that the words are those of another writer.

You are plagiarizing if you use a sequence of words, a sentence or a paragraph taken from other writers without acknowledging them to be theirs. Acknowledgement is indicated either by (1) mentioning the author and work from which the words are borrowed in the text of your paper; or by (2) placing a footnote number at the end of the quotation in your text, and including a correspondingly numbered footnote at the bottom of the page (or in a separate reference section at the end of your essay). This footnote should indicate author, title of the work, place and date of publication, and page number.

Method (2) given above is usually preferable for academic essays because it provides the reader with more information about your sources and leaves your text uncluttered with parenthetical and tangential references. In either case words taken from another author must be enclosed in quotation marks or set off from your text by single spacing and indentation in such a way that they cannot be mistaken for your own words. Note that you cannot avoid indicating quotation simply by changing a word or phrase in a sentence or paragraph which is not your own.

B. In adopting other writers' ideas, you must acknowledge that they are theirs.

You are plagiarizing if you adopt, summarize, or paraphrase other writers' trains of argument, ideas or sequences of ideas without acknowledging their authorship according to the method of acknowledgement given in 'A' above. Since the words are your own, they need not be enclosed in quotation marks. Be certain, however, that the words you use are entirely your own; where you must use words or phrases from your source, these should be enclosed in quotation marks, as in 'A' above.

Clearly, it is possible for you to formulate arguments or ideas independently of another writer who has expounded the same ideas, and whom you have not read. Where you got your ideas is the important consideration here. Do not be afraid to present an argument or idea without acknowledgement to another writer, if you have arrived at it entirely independently. Acknowledge it if you have derived it from a source outside your own thinking on the subject.

In short, use of acknowledgements and, when necessary, quotation marks is necessary to distinguish clearly between what is yours and what is not. Since the rules have been explained to you, if you fail to make this distinction your instructor very likely will do so for you, and they will be forced to regard your omission as intentional literary theft. Plagiarism is a serious offence which may result in a student's receiving an 'F' in a course or, in extreme cases in their suspension from the University.
